- ✓ Handy pocket size
- ✓ 100% mobile
- ✓ User-friendly
- ✓ Easy to use
- ✓ Suitable for left- and right-handed users
- ✓ Prints max. 40 characters, single line

The little speedy one

The speed-i-Jet 798 is a handy marking solution for fast, manual labeling directly on site. Text, sequential numbers, dates, and times can be printed on paper and cardboard using mobile devices.

The print image is simply created on a PC using PCset and transferred to the device via USB. Marking is then carried out directly by hand, similar to using a pen.

Thanks to its manual operation, the speed-i-Jet 798 is particularly suitable for short, direct markings with controlled hand movements. Flat surfaces made of paper or cardboard can be reliably marked.

Thanks to its handy pocket size, the device fits easily into any utility or shirt pocket and is ready for use at any time.

Operation: Drag across the surface to be marked and press the red button – done. Thanks to its rechargeable battery, it's ready for use all day long.
